

SAP ANALYTICS CLOUD

SAP Analytics Cloud is a software-as-a-service (SaaS) business intelligence (BI) platform designed specifically for providing all analytical capabilities.

Integrate benefits of planning, Business Intelligence, and Predictive Analytics in a single product. Powered by AI technologies and an in-memory database, it is one of the most advanced analytics solutions available today.

Allows the consumption of a wide variety of sources, from local: SAP BW / 4HANA, SAP S / 4HANA, SAP Universes, SAP ERP, SAP HANA, SQL databases, local files (.CSV, TXT, .XLSX), etc. , to those located in the cloud: SAP Cloud Platform, SAP Cloud for Customer, SAP S / 4HANA Cloud, SAP Data Warehouse Cloud, Concur, SuccessFactors, Salesforce, etc.

Who is it for?

For different teams or departments of a company that require immediate access to reports from anywhere. From end users who need to integrate different data sources to generate their own reports, to key users who develop custom analytical applications.

Technological solutions

Optimizes the visualization of data and business analysis in real time, promoting the development of strategies, decision making and business planning.
