ELECTRONIC SIGNATURE IN SAP

Electronic documentation signature module from SAP system with or without SAP PO (Process Orchestration). With this module, it is possible to digitally sign documents before they are sent to recipients in order to ensure the identity and integrity of the information sent.

Who is it for?

- For those companies that wish to send documentation generated in SAP by signing it previously to ensure the identity and integrity of the information. By configuring a simple JAVA module and having an entity certificate it is possible to sign the documentation.

Advantages

- Automatic signing of digitally signed documentation.
- Simple setup.
- Compress/Unzip files to be signed.
- Individual signing.
- Mass signing.
