METAPOSTA CONNECTOR

oreka i.t.
corporate balance

Connector between SAP ERP and / or S/4HANA management system and Metaposta Internet mailbox for automatic sending of documentation to employees, customers or suppliers through a secure channel.

Who is it for?

For all companies that send documentation generated from SAP to employees, customers or suppliers, either physically or digitally, and that want to use an automatic and secure system at the level of confidentiality and information integrity.

Advantages

- Optimization of sending documentation process (payroll, invoices, …)
- Safe channel for sending information both at source (SAP) and at destination (Metaposta)
- Sending process monitoring system.
- Electronic document signature process.
- Optimization of document mass mailing process.

Real implementations

- Implementation for payroll sending to Metabox in Mercedes Benz Vitoria.
- Implementation for secure sending of AMVISA invoices.
