

SAP/SHAREPOINT CONNECTOR

*COLLABORATION

Collaboration agreement with Intellidocx company, which has a connector certified by both SAP and Microsoft to integrate SAP and Sharepoint in a transparent way for the user.

Compatible with the different SAP modules (FI - MM - HR - PM...).

Who is it for?

- For companies that work with SAP as ERP and have Sharepoint licenses, which will allow to use this tool as a documentation repository.
- For all companies that are in the process of analysis for the acquisition of a documentation repository.

Technological solutions

- Allows you to store SAP information in Sharepoint using the GOS button, type documentation:
 - Work orders.
 - Sales orders.
 - Manufacturing orders.
 - Invoices.

Advantages

- Centralized documents repository, adding them useful metadata.
- Share SAP documents: thanks to the integration with Sharepoint, it is possible to share them with users on an occasional or permanent basis, both with users within the organization and with external users.
- Organize content through business views, by business lines or processes, by location or customers, for example.
- Quick content search: using metadata, documentation can be easily searched.
- Access from mobile devices: it is possible to access documentation from mobile devices thanks to Sharepoint application.
