

APP for GOODS INPUT developed in ABAP CLOUD

An application that streamlines the incoming goods process at the shop floor. The introduction system is so simple that the production line operator can perform goods receipts (and acceptance) easily, quickly and with a tablet/mobile or similar, without the need for additional guns or tools.

Who is it for?

- Companies with a need to digitise warehouse processes through the use of mobile devices.

Technological solutions

- The architecture used is based on a cloud extension that provides the service described.
- Development in Abap Cloud but compatible with On-Premise versions.

Advantages

- Streamline and automate the registration of goods in the system using mobile devices.
- Use a simple, user-friendly tool for the warehouse user.
- Same device (Tablet) for system control (SAP) and MS (no guns or similar would be necessary).
- Control of information in real time.
- Compatibility with Cloud and On-Premise versions.
- Flexibility to develop customised functionalities for processes specific to each business.

Why OREKA IT ?

- We are SAP Gold Partner
- SAP Recognized Expertise in Human Capital Management.
- Specialists in SAP business management solutions for companies and public institutions in any sector.
