

## HCM EMPLOYEE CLONING

An employee data copy tool, essential for the maintenance of SAP Human Resources Systems, significantly reducing analysis and test execution times in development or integration environments.

### Technological solutions

- Allows copying information from the following SAP HCM modules:
  - Personnel administration master data.
  - Payroll calculation.
  - Time management.
  - Travel management.
- Allows copying both standard and custom info types.

### Advantages

- Significantly reduces employee data refresh time in test environments.
- Facilitates the cloning of specific cases to be reproduced in test environments, since it allows users to decide who wants to copy, what information and where to copy it.
- Preserve employee's privacy thanks to data anonymization.
